

Malmö hospital, Sweden

Sustainability is important to us

Benefits with Aura Lunaria

- Energy efficient
- No UV-radiation
- Low weight
- 50.000 hours lifetime
- DALI dimmable
- Shallow height – suitable for low depth ceilings
- Up to 83 lm/W

Malmö University Hospital is the third largest university hospital in Sweden, a large part of the welfare sector and a significant part of the community. Sustainability is therefore of great importance to the hospital. They work in environmental projects in all organizations and at all levels.

Better light in public areas

Håkan Hansson at Region Skåne has decided to install 20 pieces of Aura Lunaria in entrances and elevators at the University Hospital in Malmö. "We replaced very old lighting with these new LED panels that give a really nice and inviting lighting in our facilities," says Håkan.

Reduced energy consumption

Håkan says that the light display is fantastic and it is also an energy saving solution. "We are reducing our energy con-

sumption with this solution, there's no doubt about it. With the help of the sensors, we save even more."

Sustainability is important

"Sustainability is important to us at Region Skåne, we have concrete goals that says that we should reduce and revise our energy values. This lighting project is part of our energy solution", says Håkan Hansson.

About Aura Light

Aura Light develops and supplies sustainable lighting solutions to professional customers, enabling them to reduce cost, energy consumption and environmental impact. Aura Light is acknowledged for long lifetime, high quality and energy reduction, where our lighting solutions can reduce the energy consumption by up to 80 percent.
